INFORMATION BULLETIN

Approval of Stormwater Quality Proprietary Products

Issue Date	**16 March 2020**	NUMBER **DE020**
Department	Development Services	
Program	Development Engineering	

1 Purpose of this Information Bulletin

To provide industry representatives, developers, and consultants with information regarding the acceptance of stormwater quality proprietary products.

2 Details

The use of proprietary products to meet the state planning policy stormwater quality objectives is supported by Council for private sites. Council has approved two proprietary products in line with Council's proprietary product conditions (which generally align to the SQIDEP (Stormwater Quality Improvement Device Evaluation Protocol) from Stormwater Australia) and they are:

- Ocean Protect's Storm Filter with treatment train
- SPEL's SPEL Filter with treatment train

Any future development application that proposes a proprietary product must be accompanied by a detailed maintenance plan, SBSMP (Site Based Stormwater Management Plan) with MUSIC model, and detailed design of the system including invert levels and filter design for the specific site.

3 Date of Effect

16 March 2020

4 Enquiries
