

Shakespeare Street

Shakespeare Street between Sydney and Milton streets will be rehabilitated to improve the condition of the existing road and provide improved access to streets off Shakespeare Street. The road will be reconfigured to provide a single lane in each direction, with a dedicated centre lane for turning into side roads, minimising disruptions for through traffic.

On-street parking will generally be retained along Shakespeare Street and improvements will be made to the Milton and Shakespeare streets intersection.

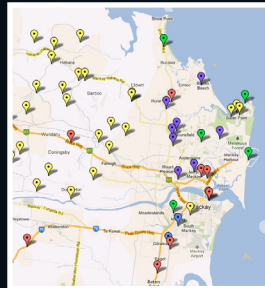

Connors Road

In June 2012, the \$27 million revamp of Connors Road commenced and works will continue until early 2014. Features of the multi-million-dollar rehabilitation include the construction of additional lanes in each direction between Archibald Street and Boundary Road, reconstruction of pavements, installation of traffic signals and improved stormwater drainage.

 **Mackay REGIONAL COUNCIL**

Road network improvements

City Centre to Paget Precinct

Rebuilding our roads

Mackay Regional Council is commencing the restoration of important arterial roads that provide connections between the Mackay City Centre and Paget Industrial Precinct.

This \$60 million project will provide improved access to the eastern and southern suburbs of Mackay through the rehabilitation of our road network. Some of these projects are funded through the assistance of the National Disaster Relief and Recovery Arrangements (NDRRA) program which is a Federal Government initiative.

Paradise Street

The rehabilitation of Paradise Street will continue in 2013 with a number of sections being restored throughout the year. The sections between Archibald Street and Bridge Road will be rehabilitated and a new roundabout will be constructed at the intersection of Henman Street. Milton Street will also be reconstructed between Griffin Street and Evans Avenue. Refer to the map or council's website for more details.

Bridge Road

Rehabilitation works will commence on Bridge Road between Paradise and Milton streets in January in an effort to complete the project ahead of the sports season in March. Traffic will be able to travel in both directions on Bridge Road during construction and access to residents will be maintained. However, access to Warland Street from Bridge Road will be limited with alternative access being provided via Paradise and Milton streets.

Juliet Street

Reconstruction works will occur between Kippen Street and Bridge Road from March/April. During working hours some delays are expected, however, two-way traffic should be in place outside working hours.

Archibald Street

The upgrade of the Archibald Street roundabout at Connors Road will be commencing mid 2013. The works include construction of a dual lane roundabout and upgrade of approaches from Connors Road, Archibald Street and Paradise Street. These works complement the Connors Road and Paradise Street rehabilitation works.
