

# Hooker's Bauhinia

*Lysiphyllum hookeri*  
lye-see-FILL-um HOOK-er-eye

**An attractive rounded small tree with white orchid-like flowers and prominent long red stamens.**

The dark fissured trunk and lobed grey/green foliage make for an interesting feature or shade tree.

This tree can be semi deciduous in drier periods. The leaf drop will be followed by a brilliant show of flowers.

Category: Tree (5-10m)

Height: 7 metres

Spread: 5 metres

Full sun

Drought tolerant once established

Tolerates a wide range of soils

Insect and butterfly attracting

Traditional use plant

## HOT TIP:

This tree will grow in full sun, partial sun, or in shade, but performs best in full sun. It is moderately tolerant to salt so will grow in coastal locations.
