MRC will deal sensitively with issues associated with memorials but does not encourage the placement of roadside memorials within the road reserve due to the potential road safety impacts of such memorials.

6.0 Policy Statement

6.1 Location

- A memorial should be located in a position where it will not distract drivers' attention from the driving task or interfere with the role of any traffic control item.
- A memorial should be located in a position where it will not be hazardous to passing traffic and or pedestrians or prevent appropriate maintenance of the road reserve.
- Applicants are to make themselves aware of any possible risks in visiting roadside memorials as well as safe practices in this regard, e.g. stopping clear of traffic. Wherever possible, the location should be chosen to minimise risk of a road accident/incident.
- In the interests of road safety of persons installing memorials there are a number of locations where the placement of memorials is restricted. Examples of locations where memorials are not permitted include urban multi-lane arterial roads, traffic islands, medians and roundabouts or where they may interfere with any traffic control devices. Subject to applications and location details being provided by the Applicant appropriate locations can be discussed with MRC to maintain traffic, construction personnel and visitor safety.
- Applicants applying for installing a roadside memorial will not be required to provide indemnification or public liability coverage in favour of MRC.

6.1.1 *Construction*

Roadside memorials should be contained within the following dimensions:

- Height 750 mm
- Width 500 mm
- Depth 400mm (below ground)

6.1.2 *Relocation and Removal*

- Any objection or complaint from nearby residents or from road users regarding any aspects of memorials, including the activity of visitors to the memorial will be carefully considered and if necessary, the memorial will be relocated or removed by the applicant on direction from MRC.
- Roadside memorials presenting a safety hazard to road and road verge users will be removed, however, every effort will be made by MRC to contact the person/s responsible for the memorial.
- There may be times when roadworks are required at the location of a roadside memorial. When this is required MRC will relocate the memorial for the duration of the works and then replace it, if possible.
- Every attempt will be made by MRC to consult those affected prior to the removal or relocation of the memorial. If the memorial obstructs the completed roadworks, it may be removed to a different location, following contact with those affected where possible.

6.2 Other

- MRC is will not accept responsibility for the maintenance of memorials, or any loss, damage, removal or relocation of roadside memorials that may occur due to road maintenance of construction activities.
- Any application to establish memorial trees must comply with MRC's policy regarding street trees particularly in relation to spatial location and appropriate species.
- In general, a time limit of twelve (12) months will be allowed for memorials subject to renewal after which it will be the responsibility of the applicant to remove the memorial or alternatively MRC will remove the memorial at the applicant's expense.
- No formal application form exists however applicants should submit documentation in writing to the Manager Transport & Drainage Infrastructure Planning for approval. This application should include a background on the proposed memorial and justification for such an installation together with location plans and photographs of the surrounding location so that it may be accurately located by MRC staff when assessing the application.
