

Brush Hovea

Hovea longipes

Hoe-VEE-ah LON-gee-peeZ

Category: Shrub (under 5 metres)

Height: 3 metres

Spread: 2 metres

Full sun

Prefers a drier less humid location

Well-drained sandy or loamy soil

Bee attracting

Butterfly attracting

Suitable for hedging

A very attractive rounded shrub with bluish purple pea-shaped flowers from March to September.

The dark green leaves have a notched tip and the underside of the leaf is densely clothed in hairs and is a silvery colour.

To encourage a tighter denser habit, regular light pruning is recommended. Suitable for hedging.

HOT TIP: Regular pruning will make this a dense shrub which will look spectacular when in full bloom.
