

Blue Umbrella

Mackinlaya macrosciadea

mak-in-LAY-uh mak-row-SIGH-add-ee-uh

This slender rainforest shrub with glossy compound umbrella-like leaves makes for an interesting feature in part shade.

The sprays of grey-blue fruit provide a distinct contrast to the vibrant green foliage. The flowers are small, white, cream or green and can occur all year round. The perfect small shrub for filling gaps under larger trees or in shady places.

Category: Shrub (under 5m)

Height: 3 metres

Spread: 1 metre

Prefers partial shade

Prefers adequate moisture

Well composted soil

Butterfly attracting

Indoor plant

HOT TIP:

Potted up this makes for an interesting indoor plant.
