

Blue Umbrella

Mackinlaya macrosciadea

mak-in-LAY-uh mak-row-SIGH-add-ee-uh

Height: 1 to 3 metres

Spread: up to 1 metre

Prefers partial shade

Prefers adequate moisture

Well composted soil

Butterfly attracting

This slender rainforest shrub with glossy compound leaves make for an interesting feature in part shade.

The sprays of grey-blue fruit provide a distinct contrast to the vibrant green foliage. The perfect small shrub for filling gaps under larger trees or in shady places.

Potted up this makes for an interesting indoor plant.
