

# Crinum Lily

*Crinum pedunculatum*

CRY-num ped-un-kew-LAH-tum

Category: Shrub (under 5m)

Height: 2 metres

Spread: 3 metres

Full sun - part shade

Tolerates boggy and dry conditions

Tolerates a range of soils

Bee attracting

Host to the Lily Caterpillar Moth

**A clumping plant with bright green upright strappy foliage and white 'spider' flowers.**

Commonly found along riverbanks, beachfronts, mangroves fringes and swampy areas, this plant can tolerate a wide range of conditions.

It makes an excellent feature plant for a home garden and is very hardy once established.

**HOT TIP:**

Frogs love to seek shelter in the broad leaves.

**CAUTION:**

All parts of the plant are poisonous if ingested.
