

# Lime Berry

*Micromelum minutum*

mike-roh-ME-lum min-YOO-tum

Category: Tree (5-10m)

Height: 8 metres

Spread: 5 metres

Full sun - part shade

Moderate water

Tolerates most soils

Insect attracting

Suitable for screening

Traditional use plant

**An attractive shrub with regular blooms of heavily scented showy white flowers and prolific orange/red fruits.**

This plant is a must for any wildlife garden. Clusters of creamy fragrant flowers attract a myriad of insects. These are followed by the fruit which are relished by a variety of birds.

**HOT TIP:** It is a host plant for the stunning Orchard Swallowtail (*Papilio aegus*) and Fuscous Swallowtail (*Papilio fuscus*) butterflies.
