

Tuckeroo

Cupaniopsis anacardioides

ku-pan-ih-OPS-iss an-uh-kard-ih-OY-deez

Height: 8 to 10 metres

Spread: 3 to 5 metres

Full sun to light shade

Drought tolerant once established

Prefers a well-drained soil

Bird attracting

Bee attracting

A popular small, evergreen feature tree with glossy green foliage and a rounded shape. Commonly seen as street and shade trees.

Spring brings small cream flowers that are followed by bright orange fruit containing black seeds covered by a red waxy aril that are popular with birds.

This plant's ability to tolerate salt-laden winds makes it perfect for coastal plantings. Regular light pruning encourages a dense habit which may be helpful if using as a screen or hedge.
