

# Gold-dusted Bottlebrush

*Melaleuca hemisticta*

mel-luh-LOO-kuh hem-ee-stick-tah

**A hardy attractive shrub with grey, papery or fibrous bark and distinctive red bottle brush flowers. The filaments are tipped with yellow anthers giving a gold-dusted appearance.**

This plant can grow in a range of habitats but is often found in coastal areas on the sides of cliffs.

Suitable for growing as a specimen plant or pruned to maintain the desired size and shape.

Category: Tree (5-10m)

Height: 6 metres

Spread: 4 metres

Full sun

Drought tolerant  
once established

Tolerates a wide  
range of soils

Insect and  
butterfly attracting
