

Java Sedge

Cyperus javanicus

sy-PEE-rus jar-van-EYE-kuss

Height: 0.4 to 1.2 metres

Spread: up to 1.5 metres

Full sun to dappled shade

Highly adaptable

Highly adaptable

Insect attracting

This hardy tufted perennial sedge has grey-green foliage which provides great contrast in a garden.

Naturally found growing in seasonally wet depressions, this plant makes a fabulous tufted border or filler plant. Java Sedge tolerates drier conditions although performs better in a damp location. Looks brilliant planted en masse.
