

# Sea Lettuce

*Scaevola taccada*

skee-VOH-luh ta-KAH-duh

Category: Shrub (under 5m)

Height: 3 metres

Spread: 2 to 4 metres

Full sun

Drought tolerant  
once established

Well drained soil

Suitable for  
screens and  
hedging

**An erect, spreading, evergreen shrub with somewhat succulent dense leaves and soft-wooded stems makes this a perfect hedging or screening plant which flowers and fruits throughout the year.**

Grows in a wide variety of soil types but prefers sandy soils and is salt tolerant. A good choice for planting on dunes to help stop erosion.

**HOT TIP:** Plants are very tolerant of trimming and can be shaped into hedges and screens
