Weeping Lilly-Pilly has a lightly weeping habit and leaves with wavy edges.

Weeping Lilly-Pillies flowers in summer with trusses of white fluffy flowers. Fruit is pale green to pale pink in colour. Weeping Lilly-Pilly is a hardy tree for temperate to tropical climates in reasonably well-drained soils. Once established it will tolerate extended dry conditions but is at its best when adequate water is available.

HOT TIP: Grows best in a sunny spot with good regular watering, but can tolerate extended dry conditions.
