

Cook's Screw Pine

Pandanus cookii
pan-DAY-nuss COOK-ee-eye

This palm-like tree with spiralling grey/green foliage and prop roots makes for an interesting feature in any garden.

Orange pineapple-like fruit hanging from branches make for a conversation starter. Leaf margins are typically smooth although small teeth maybe present on juvenile foliage and leaf undersides. Commonly found near swamps and creeks this plant can handle wetter soils.

Height: 6 to 10 metres

Spread: 2 to 8 metres

Full sun to part shade

Drought tolerant once established but prefers moisture

Well drained soil

Insect attracting
