

Native Coleus

Coleus diversus

col-EE-us di-ver-SUS

Native Coleus is a hardy evergreen shrub growing 1 to 2 metres high.

Sprays of small purple flowers are a magnet for bees and butterflies. The foliage produces a mild lemon scent that is more noticeable when rubbed. These highly adaptable shrubs can be pruned to shape, grow well in containers and suit a cottage style garden.

Category: Shrub (under 5m)

Height: 1-2 metres

Spread: 1 metre

Full sun to part shade

Adaptable

Adaptable

Bee attracting

Suitable for hedging

HOT TIP: Pruning after flowering will encourage a dense growth habit.
