# Fifth Lane Street Art project

The Fifth Lane activation project started with a few local artists wanting to beautify one of the major lanes in the Mackay CBD. The original idea of brightening up the walls developed into an engaging creative space full of murals, paste-ups, digital art and community art, all fused with augmented reality technology. The team of 16 local artists and five visiting artists have created an outdoor gallery that has something for everyone.

## Augmented Reality experiences

With the added use of current App Technology, visitors to the lane can now experience the artwork on a completely new level. Download the free Zappar app to your smart device (available through Google Play and Apple Store) to watch the artworks come to life.

## Get ready, aim, zap!

There are seven augmented reality experiences available on Fifth Lane. Simply download the Zappar app to your smart device. Open the app and look for the Zappar codes near the artworks. Find the Zappar symbol on the laneway pavement, stand on the symbol and aim your phone or smart tablet directly at the artwork. Don't forget to turn on the sound for an even better experience!
